

## September 2016 – Mayor’s Message

Summer months are now over, they brought the opportunity for many fun things – vacations, family reunions, swim parties, boating, hiking and enjoying the outdoors. At Murray City, summer and early fall are times of hard work as we have a short window of time to complete some of the construction projects planned during the winter months. Change is not always fun and can be challenging when inconvenienced by time, dust and detours. We are at the end of our summer construction season and hope we have good weather as we go into fall so we are able to complete more of our planned projects. We appreciate your patience. To date, we have completed roadway reconstruction and resurfacing on:

- 1830 East
- Norma Circle
- Ann Dell Lane
- Bullion Street
- Chevy Chase Drive
- Chevy Chase Circle
- Kent Circle
- 1000 East
- Ellerby Avenue

Still continuing into fall are:

- Fairhaven Drive
- Dunbarton Drive
- Somerset Way
- 1045 East
- 6215 South
- 6220 South

Ellerby Avenue before and after

The city will continue to slurry seal various neighborhoods west of State Street and replace damaged sidewalk in areas east of State Street. Slurry seal is a mat of asphalt emulsion, water, polymers and aggregate that is applied to the street to create a new surface. This application is used to extend the life of a street showing signs of deterioration. Slurry seal gives the road an extended life of approximately five years.

The 5900 South reconstruction project began in April. The first phase from Commerce Drive to 700 West is near completion. The second and third phases will be encompassing Commerce Drive to State Street. This project includes new storm drain and water lines as well as sidewalk improvements, roadway resurfacing and signal upgrades. The intersection of 5900 South and 300 West will be widened and new signals are being added to improve safety at the UTA Trax crossing. Traffic delays can be expected; the roadway will be restricted to local traffic only during major construction operations. Please try to help us by using alternate routes when possible. Efforts will be made to continue pedestrian access throughout the length of the project. For project updates, you can email [5900south@utah.gov](mailto:5900south@utah.gov).

Thank you again for your patience during these next months as we work to complete our projects and continue to improve our city’s infrastructure.

Sincerely,

Ted Eyre, Mayor

5900 South Water Line Construction
