Public Hearings

Staff and sponsor presentations, and public comment will be given prior to Council action on the following matter.

1. Consider an ordinance relating to land use; amends the General Plan from Low Density Residential to Medium Density Residential for the property located at approximately 344 East 5600 South, Murray City, Utah. Applicants: Murray Yellow House
(See Attachment 1 for slides used during presentation)

Staff Presentation: Melinda Greenwood, Community and Economic Development Director

Ms. Greenwood explained that this property is currently zoned low density residential and the applicant has requested that the zone be changed, through a General Plan amendment, to medium density residential. Ms. Greenwood showed a map of the property and noted that the applicant owns the property adjacent and to the east of the subject property. That property is currently being used as multi-family housing. She also showed a side-by-side comparison of the 2003 and 2017 General Plans. In 2003, the General Plan had this property listed as low density residential, which is what it is currently listed as in the 2017 General Plan.

Ms. Greenwood said the Planning Commission heard this item on February 7, 2019 and has forwarded a recommendation of denial to the City Council. Staff is also recommending denying this proposal.

Mr. Nicponski asked what Planning Commission's overriding argument was against increasing the density from low to medium.

Ms. Greenwood replied the first reason was because this property has been on the books for quite a while as low density and the Planning Commission tends to be supportive of the General Plan, especially since it was just redone in 2017. The second reason was because a medium density property can have between 6 and 22 units on it per acre where a low density property can only have between 1 and 8 units on it per acre.

Mike Lami, Agent – Murray Yellow House

Mr. Lami said he feels that the Planning Commission felt that the General Plan was accurate and that nothing should be changed on it because it is so new. However, Mr. Lami understood that there was one instance where the algorithms in the software that created the General Plan were wrong, so the zoning had to be changed at the Applegate Condominiums.

The public hearing was open for public comments.

Joyce Page – Murray City, Utah

Ms. Page said she has lived on Hillside Drive for 49 years. In that time, she has seen many houses hit by cars. She said they don't have trees in their parking strip anymore because

after replacing them over and over again, they can't afford to do it anymore. They do have to keep a tree in their front yard to keep cars from hitting their house.

Ms. Page said when the city put in Fashion Blvd. in, it helped with the traffic quite a bit. Now the problem is, when the School District built the new junior high school, they put the bus and parent drop-off and pick-up at the end of Hillside Drive, so the traffic is back again. She also said there is a curve right by the school that is always going to be a danger spot. Drivers cannot see kids walking to school and cars always cut through that curve. The residents cannot afford to have more traffic in this area.

Patrick Garcia – Murray City, Utah

Mr. Garcia said the problem is people cut through the middle of that street and there is a junior high school and an elementary school on that same street making it a thoroughfare for kids going to and from school all day long. Increasing the density of this property will cause accidents as people try to enter and exit the property.

Mr. Garcia added that one of the reasons he chose his home was because there wasn't a multi-family unit near it. Changing the zoning of this property would be a detriment to all the properties that surround it and are in proximity to it. He is also worried about the fact that because the applicants own the property that is adjacent to the property they want to rezone, they could possibly decide to build a much larger project.

Menlee Maxfield – Murray City, Utah

Ms. Maxfield said the whole area surrounding the property the applicant wants rezoned is essentially single-family homes and adding a multi-family unit in that area is concerning. She is also concerned that the applicant could make an even bigger project because they own the adjacent property.

Pat VanHeyst – Murray City, Utah

Ms. VanHeyst said she has almost been hit head-on on that curve on Hillcrest Drive. More homes will add more traffic. When she first moved to the area, Hillcrest Drive was a busy road and she had a car land upside down in her yard. The traffic did decrease when Fashion Blvd. came in, but the traffic is coming back now.

Ms. VanHeyst reiterated what everyone else had said and added that medium density in a nice, little, quiet neighborhood doesn't make sense.

Joan Tew – Murray City, Utah

Ms. Tew said the applicant's property is not taken care of. It is covered with weeds and dead trees. If they higher the density on that property, the applicant will build something that the neighbors will not be happy about. She said this whole area is a place for single-family homes and is no place for multi-family houses.

Brooke Garcia – Murray City, Utah

Ms. Garcia said as a parent, she is familiar with how kids walk and bike to school. Her family just moved to Murray from Holladay where a developer just put in 15 townhomes where three single-family homes once were.

Ms. Garcia said there are enough apartments and townhomes in Murray and they like the fact that their neighborhood still has part of its original Murray charm. Even adding eight new homes is a lot especially on a property where there was once only one home. It will also add to the traffic.

Mr. Hales closed the public hearing.

MOTION: Ms. Turner moved to adopt the ordinance. No second was given; motion died for lack of a second motion.

MOTION: Mr. Nicponski moved to deny the ordinance. The motion was **SECONDED** by Mr. Cox.

Council roll call vote:

Mr. Nicponski Aye

Mr. Cox Aye

Mr. Brass Aye

Ms. Turner Aye

Motion passed 5-0 (Ordinance Denied)

Legislative Report

Staff Presentation: Dale Cox, Councilmember

Mr. Cox said that HB 441 – Tax Equalization and Reduction Act was withdrawn because of public pressure. The Legislators listened to their constituents and pulled this bill from the agenda and are going to study it, which they should do. There are things that need to be done to maintain city and state services, but this was a little too much too fast. HB 495 – Tax Restructuring and Equalization Task Force was created on the last day of the Legislature to study what should and shouldn't be taxed.

SB 129 – Public Safety and Firefighter Tier II Retirement Benefits passed with some amendments but will not go into effect until 2020. Firefighters used to have a 20 year, 50% pension and it was changed to 25 year, 37 1/2% pension. Their pension will now go back up to 50%, they just need to figure out the funding, but that will be taken care of in the next year or so.

SB 34 – Affordable Housing Modifications passed both the House and Senate. This bill modifies requirements and reporting of municipalities and counties related to the moderate-income housing plan element of their general plans. It modifies the law on moderate and low income housing. Mr. Cox thinks Murray is in a good spot with this. There are a lot of moderate and low

income housing in Murray and more is being build all the time.

HB 320 – Container Regulation Act was a bill the Legislature ran to ban cities from being able to moderate what type of plastic bags, or other containers, they can allow in their cities. If cities what to do something with plastic or paper bags, they should be able to. This bill did not pass.

HB 119 – Initiatives and Referendum Bill revamps the process to be able to put something on the ballot.

Mr. Nicponski added the other good thing that happened this session is that cities are still allowed to transfer money from enterprise funds to the general fund. The bill that would have prohibited that did not pass.

Mayor's Report and Questions

Mayor Camp said there will be an online survey that will go live next week for the Parks and Recreation Master Plan. The survey can be accessed from both the front page of the city's website as well as the Parks and Recreation webpage.

He noted that crews are filling potholes and sealing cracks in the streets as the weather permits.

He said the bridge on 6400 South at the Canal should be finished at the end of the month. He credited the Public Works Department for their great job on that project.

The city should have a contractor hired in May and start work in June on the Phase 1 Vine Street project between 900 East and 1300 East.

He noted that the city is aware of a glitch in the online payment software. It is currently not accepting online payments for business license renewals. The IT staff is working on it and will soon have a solution to that problem.

He stated that this week is Fix-a-Leak Week. The Water Division has a booth set up at the Lowes at 4500 South and 500 West and are there to offer expertise and assistance to anyone who needs it.

Adjournment

The meeting was adjourned at 7:24 p.m.

Project Description /	<i>Removal of invasive plant species</i>		
	Mechanically and chemically remove invasive plant species on two parcels		
Abstract	owned by Murray City 4500 South to Big Cottonwood confluence		
Project Funding	Amount Requested	Matching Funds	Total Project Cost
	\$ 22,500.00	\$ 23,203.50	\$ 45703.50

Project Intended outcomes:

Habitat Improvement

On the East side of the river from 4500 South to the Big Cottonwood confluence, we will remove Russian Olive, Phragmites, Tamarix and Puncture Vine in the two parcels, approximately six acres, owned by Murray City. We will revegetate with willow, cottonwood, wild roses, sumac, currants, choke cherries and squaw brush. The willow and cottonwood will have the potential to stabilize the bank. The cottonwood will give birds of prey places to perch, the smaller plants will supply food and shelter for birds and other wildlife. Included is a letter from the Murray City Forester expressing his concerns for this area.

Recreation

By removing the invasive species, the area can be utilized for fishing and viewing waterfowl. Currently it is difficult to get to the river bank in this area. It will enhance birdwatching by providing assorted plant species that birds use for food. Additionally, this project will offer opportunities for hiking due to improved trails in this section.

Public Safety

Included in this proposal is a letter from the Murray City Police Chief highlighting some of the current problems that exist in this section of the Jordan River. Removing plants that densely grow will assist in eliminating favorable conditions for campsites and other nefarious actions. It will aid emergency responders in locating people facing potential harm and reduce the risk of fire by thinning out the heavy plant growth. Also included is an email from Moog Medical Devices which borders the project area, expressing belief that clearing the foliage will simplify locating potential problems and make it less attractive for criminal activity.

Project Work Plan:

Integrative Approach for Invasive Species Management

Murray City will contract a tree removal company to level the invasive plant species which will then be chipped on site and transported to a land fill. A licensed Murray City Parks pesticide applicator will be on site to apply herbicide to tree stumps to mitigate the likelihood of sucker growth. Puncture Vine will be sprayed with a nonselective herbicide and any plants that are substantial and have seeds will be mechanically removed and bagged. All cut materials will be transferred to a landfill. We will start the project in early spring and target late spring to finish both parcels. However, spring run off may, or may not hinder these proposed start and finish dates, and if so, the work will commence when weather conditions allow. Phragmites will be sprayed in the fall with an aquatic safe pesticide.

Long Term Plan

Murray City Parks long term plan is to monitor the area regularly and remove sucker and volunteer growth. We will utilize mechanical and chemical methods to remove weeds and unwanted plants. Our experience in the Parks department shows that impeding growth of invasive plants requires constant effort and commitment. A commitment that we believe has been demonstrated exceptionally by our willingness to implement consistency in inhibiting any further invasive growth on the Jordan River as it

runs through Murray City. At this time, we are not committing to any irrigation systems but will manually water new transplants to ensure that they take root and grow.

Plan Details

Included in this proposal is a map with an aerial view.

Budget:

Contract tree removal	\$20,000.00
Plants	\$3000.00
Pesticides	\$600.00
Equipment 84 hours x \$100.00	\$6400.00
In-Kind 200 hours x \$24.69	\$3703.50
Murray Park 240 hours x \$50.00	<u>\$12,000.00</u>
Total	\$45,703.50

Matching funds will come as in-kind hours, Murray Park staff hours, pesticides and equipment use.

Project Preparedness

There is access to the project site. Moog Medical Devices, a business that borders the project area, has volunteered in assisting the cleanup of the parcels.

I am writing to express my concern regarding an invasive tree species, Russian Olive "*Elaeagnus angustifolia*" here in Murray City. This species often displaces riparian habitats where native plants once thrived. Russian Olive has low seedling mortality rates which thrives on poor soil, matures in a short period of time, and outcompetes wild native vegetation. It has been declared a noxious weed in parts of Utah and once established, can be very difficult to control. The most effective control for this species is a cut stump herbicide treatment.

It is my recommendation to remove this aggressive species along the Jordan River Parkway to allow native vegetation to grow. Please consider providing Murray City funding for this grant to eradicate this species along our riparian zone.

To Whom It May Concern:

This letter is written on behalf of Murray City Parks Division, who are currently in the process of applying for a grant that would support the cleanup efforts along the Jordan River Parkway.

The Police Department believes that these funds would truly assist in the overall health and safety clean-up efforts we have been faced with in this area. During 2018, Officers handled various calls and proactive encounters along this area in our City. Incidents such as solid waste and human waste being left behind in makeshift encampments, drug usage and paraphernalia, loitering at businesses and panhandling.

Statistically most of these calls and encounters were with unsheltered individuals, whom are seeking a safe place to stay. With the overgrowth of Russian Olive trees, weeds and sagebrush it makes it easier for individuals to hunker down and set up temporary campsites.

We believe, should Murray City Parks be awarded grant money to put toward this clean up effort it would dramatically change the environment along this stretch in our city and most likely we would see a decline in problems and crime in that area.

Should you have any further questions regarding this matter, please feel free to contact me.

Bruce,

As you probably already know we have had numerous transients in the areas North and West of our building (located at 4314 Zevex Park Lane).

Throughout the last 8+ years (that I've been here) we have had plenty of issues with transients and transient camps in the area. We have also asked people on several occasions to leave the area to keep our employees and property safe.

Issues we have encountered:

- Employees vehicles broken into/vandalized
- Shipping containers broken into/theft (we have 3 in our back lot)
- Transient camps (currently there are remains of 2 in the North area, not sure if they are occupied)
- Transients going through ashtrays and garbage cans

One of our biggest concerns is that we have a night shift that leaves at approx. 11pm every day. We have no idea who is in the fields during the night or what may happen to one of our employees. There are no barriers between our property and the fields in question.

Removing the invasive plant species from the field areas and opening up the line of site throughout the area would definitely decrease the transient traffic and camp sites. We have seen this in the past.

You have our vote and support to clean up the areas.

Let me know how we can be of help.

11. OWNERSHIP OF RECORDS

Records prepared for the CITY shall be owned by the CITY. AUDITOR shall have access to records, documents and electronic information relating to the CITY. All such records shall retain their public or non-public classification pursuant to the Utah Government Records Access and Management Act, Title 63, Chapter 2 of the Utah Code. Upon termination or completion of this Agreement, AUDITOR shall deliver to the CITY, all records, notes, data, memoranda, models, and equipment of any nature that are in AUDITOR's possession or under AUDITOR's control relating to AUDITOR's services under this Agreement.

12. ASSIGNMENT

The rights of each party under this Agreement are personal to that party and may not be assigned or transferred to any other person, firm, corporation or other entity without the prior, express, and written consent of the other party.

13. NO CONFLICT OF INTEREST
