

## **6. Trash Receptacle**

**Operation or Site Conditions:** All trades can generate light weight trash from the lunch box alone however most will generate light weight trash as part of their operation. Light weight trash is a large concern because it can blow off the site.

**Instruction:** Contractor to provide trash receptacles with lids chained to post. Then Train all sub-contractors and trades to use the receptacles or put their trash in their own vehicle. Do not fill receptacles with heavy weight trash. Use Heavy Construction Waste BMP for heavy weight trash.

**Schedule:** Prior to land disturbance

**Maintenance:** Ensure lids are always closed. Dump when trash is spilling over.

**Maintenance Personnel:** Project Manager. Require all sub-contractors and trades to Keep lids closed.

**Applicable Trades:** All trades generating light weight trash of any kind
